

Property and Rent Consult
Version 2026 à€" June 2026

1. What This Tool Does

The PRC Maintenance Request Log is a simple, offline tracking system for property owners, landlords, and letting agents who need to manage repair requests, vendor contacts, and maintenance costs across one or more properties. It runs entirely in your browser – no internet required, no cloud accounts, no subscriptions.

This guide covers the Landlord version (1 property, up to 15 units). If you have the Manager or Portfolio version, features like unlimited properties, export, and Excel templates are also available.

2. Getting Started

Opening the App: Double-click the HTML file in your Downloads folder. The app opens in your default web browser. If prompted to enable JavaScript, click Allow.

First-Time Setup: Click the ⚙️ (settings) icon in the top-right. Fill in your property name, owner name, address, and phone number. These details will appear on printed maintenance records. Click Save Settings.

Your Data is Private: All data is saved locally in your browser. Nothing is uploaded to the internet. If you clear your browser history or cache, your data may be lost. Back up occasionally by exporting as JSON (Manager tier).

3. Adding Properties

Click the **Properties** tab, then **+ Add Property**.

Property Name: e.g. 'My Home', 'MZ Apartments', 'Sowutuom Block A'

Street Address: Optional. Your property's physical address.

Ghana Post GPS: Optional. Your Ghana Post GPS code (e.g. GHA-123-4567).

Number of Units: How many units or rooms at this property (1–15 for Landlord tier).

Property Type: Choose Residential, Commercial, or Mixed Use.

Landlord Tier Note: You can add only 1 property. Upgrade to Manager tier for unlimited properties.

4. Adding Vendors

Click the **Vendors** tab, then **+ Add Vendor**. Build a directory of electricians, plumbers, masons, and other service providers you trust.

Vendor Name: Full name or business name (required).

Trade / Specialty: Select from: Electrician, Plumber, Mason, Carpenter, Painter, Pest Control, Roofer, Tiler, General Maintenance, Security, Appliance Repair, Other.

Phone & WhatsApp: Phone is required. WhatsApp is optional (may be different from phone).

Rating (1–5 stars): Rate vendors based on reliability and quality. The app tracks average response time per vendor.

Notes: Add notes like payment terms, availability, or reliability observations.

5. Logging a Maintenance Request

Click the **Requests** tab, then **+ New Request**.

Property & Unit: Select your property and enter the specific unit or room (e.g. 'Master Bedroom', 'Apt 2B', 'Front Porch').

Category: Choose one: Structural, Electrical, Plumbing, Roofing, Painting, Pest Control, Security, Appliance, Compound/Drainage, or Other.

Description: Write a clear description of the problem (required). Be specific so vendors understand what to expect.

Priority Guide: **Urgent** – immediate action needed (e.g. no water, broken locks). **High** – within 7 days (e.g. leaky roof, broken door). **Normal** – within 30 days (routine repairs). **Low** – non-urgent cosmetic work.

Due Date: Optional target completion date.

Vendor & Costs: Assign a vendor and optionally enter an estimated cost. When the job is completed, you can record the actual cost.

Status: Open (default) | In Progress | Completed | Cancelled. When you set status to Completed, the app will ask for the completion date and actual cost.

6. Tracking and Updating Requests

From the **Requests** tab, click the pencil (✎) icon to edit a request. Change the status, add notes, update the actual cost when the job is done.

Response Time: The app auto-calculates the number of days from reported date to completion. This helps you track which vendors are fastest.

Overdue Requests: Any request past its due date and not yet completed will show as 'Overdue' in red on the Dashboard.

Deleting Requests: Click the trash (🗑️) icon to delete. This cannot be undone.

7. Using the Dashboard

The **Dashboard** tab gives you a quick snapshot of your maintenance activity:

Open Requests: All requests with status Open or In Progress.

In Progress: Count of requests currently being worked on.

Completed This Month: Jobs finished in the current calendar month.

Overdue: Requests past their due date and not yet completed.

Avg. Response Time: Average number of days from request to completion (across all completed jobs).

The Dashboard table shows all open requests sorted by priority. Click any row to view full details.

8. Frequently Asked Questions

Q: What happens if I close the browser?

A: Your data is saved locally on your computer. It will be there when you open the app again. Your data is never sent to the internet.

Q: Can I use this on my phone?

A: Yes, the app works on any device with a web browser. However, desktop or tablet is recommended for the best experience.

Q: How do I back up my data?

A: The History tab (Manager + Portfolio tiers) includes an 'Export as JSON' button. This downloads all your requests, vendors, and properties as a text file you can save.

Q: Can I print a request record?

A: Yes. Click any request in the Requests or History tab, then click the 'Print' button in the details modal. The app will format it nicely on an A4 page.

Q: Is there a Manager or Portfolio version?

A: Yes. The Manager version (GHS 99) adds unlimited properties and export. The Portfolio version (GHS 179) adds an Excel template and WhatsApp marketing cards.
