

Property and Rent Consult

1. What This Tracker Does

The PRC Rent Collection Tracker is an Excel workbook designed to automate rent tracking for landlords and property managers in Ghana. It calculates payment status, days overdue, late fees, and maintains an arrears register — all automatically. You enter payments, the workbook does the rest.

2. Setup Sheet — Configure Once

Fill in your grace period (default: 7 days) and late fee settings. Choose between a fixed amount (e.g. GHS 50) or a percentage of monthly rent. You can set a maximum cap. These settings drive all automatic calculations in the Rent Roll.

3. Tenant Register — Your Master List

Add all your tenants here with their rent amount, due date, and tenancy dates. This is the source data for all other sheets. The workbook looks up tenant information automatically.

4. Rent Roll — Record Payments

This is your working sheet. Each month, enter the period (e.g. 2026-06), then enter Date Paid and Amount Paid for each tenant as payments arrive. Status (Paid/Partial/Unpaid), Days Late, and Late Fee calculate automatically.

5. Arrears Register — Track Unpaid Accounts

This sheet automatically pulls all unpaid and partially paid accounts from the Rent Roll. Use the follow-up columns (Last Contacted, Contact Method, Response, Next Follow-up, Status) to log your collection actions.

6. Dashboard — One-Page Summary

Check this sheet anytime for your current month KPIs: total tenants, paid, unpaid, total expected, total collected, and outstanding. All KPIs update automatically when you enter payments in the Rent Roll.

FAQs

Q: Can I use this in Google Sheets?

Yes. Upload the .xlsx file to Google Drive. All formulas and dropdowns work the same.

Q: How do I archive old months?

Copy the rows from the Rent Roll and paste them into a separate 'Archive' sheet if you wish to keep old data clean.

Q: Can multiple people edit at once?

In Excel: No, one user at a time. In Google Sheets: Yes, if you share the file.
