1. What This Tool Does

The PRC Utility Payment Tracker is a self-contained browser-based application designed for landlords, property managers, and tenants in Ghana. It allows you to:

- Record and track electricity, water, and service charge payments for any number of tenants and units
- Know at a glance which tenants have paid and which have not for any billing period
- Generate a numbered, printable payment receipt for every transaction
- Build a complete searchable history of all payments across all periods
- Run entirely offline — no internet connection required after download

This tool does NOT connect to any external server. All your data is stored privately on your own device. Nothing is sent to Property and Rent Consult or any third party.

2. Getting Started

Opening the tracker:

Locate the file PRC-Utility-Tracker-[Basic/Pro].html in your download folder. Double-click it. It will open in your default web browser. You do not need to install anything.

Recommended browsers:

Google Chrome, Mozilla Firefox, Microsoft Edge, Safari.

First-time setup:

- Click the settings icon (gear ) in the top-right corner.
- Enter your property name, your name, your address, and your phone number.
- This information appears on every receipt you generate.
- Click "Save settings."

3. Adding Your Tenants

Click the **Tenants** tab. Click the **Add tenant** button in the top-right corner.

Fill in the following:

- **Full name** — the tenant's full legal name as it appears on their Ghana Card
- **Unit / Room** — the specific unit they occupy (e.g. Flat 3B, Room 4, Ground Floor)
- **Phone number** — optional, for your records
- **Tenancy start** — the month their tenancy began
- **Property / Block** — if you manage more than one property (Pro tier)

Monthly utility amounts:

Enter the fixed monthly amounts you charge this tenant for each utility:

- **Electricity (GHS)** — their share of the ECG/NEDCo bill
- **Water (GHS)** — their share of the Ghana Water Company bill
- **Service charge (GHS)** — any monthly maintenance or cleaning fee

Note: These amounts are fixed until you edit them. They apply to every billing period you record for this tenant. If the amounts change, edit the tenant record — the new amounts will apply from the next period you record.

Click **Save tenant**. The tenant appears in your tenant list immediately.

To edit a tenant: click the pencil  icon on their row.

To remove a tenant: click the trash  icon. Their payment history is kept.

4. Recording Payments

Click the **Billing** tab. Select the billing period using the month picker. Click **Load period**.

Your full tenant list appears with their amounts and current payment status.

To record a full payment:

- Click **Mark paid** on the tenant's row.
- A payment panel opens showing the tenant's name, unit, billing period, itemised breakdown, and total amount due.
- Fill in: Date paid (defaults to today), Payment method (MoMo/Cash/Bank Transfer/Cheque/Other), Received by (optional), Notes (optional).
- Click **Confirm payment**. The payment is saved and a receipt is generated immediately.

To record a partial payment:

- Click **Partial** on the tenant's row.
- Enter the amount actually received. If the amount is less than the total due, status is set to "Partial."
- A receipt is still generated for the partial amount.

To undo a payment: Click **Undo** on a paid row. This removes the payment record. Use this only to correct errors.

5. Generating a Receipt

A receipt is generated automatically after every payment you confirm.

The receipt contains:

- A unique receipt number (RCP-XXXXXXXX)
- Date issued
- Tenant full name and unit
- Billing period (e.g. June 2026)
- Itemised breakdown: Electricity / Water / Service Charge
- Total due and amount paid
- Balance remaining (if partial payment)
- Payment method and date paid
- Status (Paid / Partial)
- Your property/company name from Settings

To view a receipt at any time: go to the **Billing** tab, load the relevant period, and click the receipt  icon on the tenant's row. Or go to **Payment History** and click the receipt icon on any record.

6. Printing and Saving Receipts

Click **Print / Save PDF** in the receipt window. A clean, print-ready version of the receipt opens in a new browser tab. Your browser's print dialog appears.

- To print: select your printer and click Print.
- To save as PDF: in the print dialog, choose "Save as PDF" (or "Print to PDF") as the destination instead of a printer. Choose where to save the file.

Tip: Save receipts as PDFs on your phone or computer and send to tenants via WhatsApp, email, or SMS as proof of payment.

7. Viewing Payment History

Click the **Payment History** tab. All payment records appear, most recent first.

- To search: type a tenant name or unit number in the search box.
- To filter by status: use the status dropdown (All / Paid / Partial / Unpaid).
- To filter by period: use the period dropdown.
- Each row shows the full payment detail. Click the receipt icon to view and print the receipt for any past payment.

8. Dashboard Overview

The **Dashboard** tab gives you a live summary of the current month:

- Total tenants in your tracker
- How many have paid this month
- How many have not yet paid
- Total utility charges expected this month (sum of all tenant amounts)
- Total amount collected
- Total outstanding balance

The Outstanding Payments section lists every unpaid tenant with their total due and a quick link to record their payment. Use the period selector to view the summary for any past month.

9. Settings

Click the gear icon  in the top-right header to open Settings.

- **Property / Company Name:** appears at the top of every receipt.
- **Owner / Manager Name:** appears as "Issued by" on receipts.
- **Address:** appears on receipts.
- **Phone:** appears on receipts.

If you leave Settings empty, receipts default to showing "Property and Rent Consult" as the issuing party. Recommended: fill in Settings before generating your first receipt.

10. Frequently Asked Questions

Q: Will I lose my data if I close the browser?

A: No. All data is saved automatically on your device using browser storage (localStorage). Your records survive closing the browser, shutting down your computer, and reopening the file another day.

Q: Can I use this on my phone?

A: Yes. Open the HTML file in your phone's browser (Chrome or Safari). The app is responsive and works on mobile screens. For the best experience, use it in landscape orientation on smaller screens.

Q: Can more than one person use this tracker at the same time?

A: The Basic and Pro apps store data on a single device. If two people need to access the same data, they would need to work from the same device or the same browser on that device. Agency-tier users receive an Excel backup template for sharing records across devices.

Q: How do I back up my data?

A: Pro and Agency tier users can click the "Export data" button in the header. This downloads a JSON file of all your tenants and payment records. Keep this file as a backup. Basic tier users should note their records manually or upgrade to Pro for export functionality.

Q: What happens if I clear my browser data or use a different browser?

A: Data is stored in the specific browser on the specific device you used. Clearing browser data (cookies/cache) or switching to a different browser will show an empty tracker. Always export your data before clearing browser storage.

Q: Is my data shared with Property and Rent Consult?

A: No. This tool has no internet connection and sends nothing to any server. All your data stays on your device.

Q: Is this tool legally required under Ghanaian tenancy law?

A: No, but it supports compliance. The Rent Act, 1963 (Act 220) requires landlords to issue written receipts for rent and utility payments. This tracker generates those receipts and maintains a record — both of which support your legal position in any dispute.

11. Terms of Use

© 2026 Property and Rent Consult. All rights reserved.

This software is licensed for personal and internal business use only. The licence covers one user and their properties.

You may:

- Use this tool to track utility payments for properties you own or manage
- Generate and share receipts with your tenants
- Print, save, and archive receipts for your records

You may NOT:

- Resell, redistribute, or publish this tool in any form
- Modify and sell it as your own product
- Share the file with third parties outside your immediate business

Violation of these terms may constitute infringement of Ghanaian copyright law.

Limitation of liability:

This tool is provided as-is. Property and Rent Consult accepts no liability for data loss arising from browser storage clearing, device failure, or user error. Users are responsible for maintaining their own data backups.
